

The Manufacturing App Platform

Connect people, machines, and devices for more impactful improvements.

Tulip is an online tool to build and deploy applications on the shop floor. With Tulip, you can connect people, machines, and devices for more impactful improvements. Applications can be tailored for your initiatives--improve quality, throughput, visibility, and more.

Build Applications

Tulip's no code platform lets you build shop floor-ready applications for your lines

Connect with IoT

Instrument your apps, bring machines online, and track operator performance with IoT

Deploy Rapidly

Avoid lengthy integrations and pilot purgatory. Fast deploys means shorter time-to-value

Augment Workers

Tulip augments manufacturing workers for greater productivity, accuracy, and efficiency

50%

Increase
in throughput

60%

Fewer
quality issues

75%

Reduction in
training time
